iChain Persona Workspace & Agent

WHAT-What is it?

WHY-Why it matters?

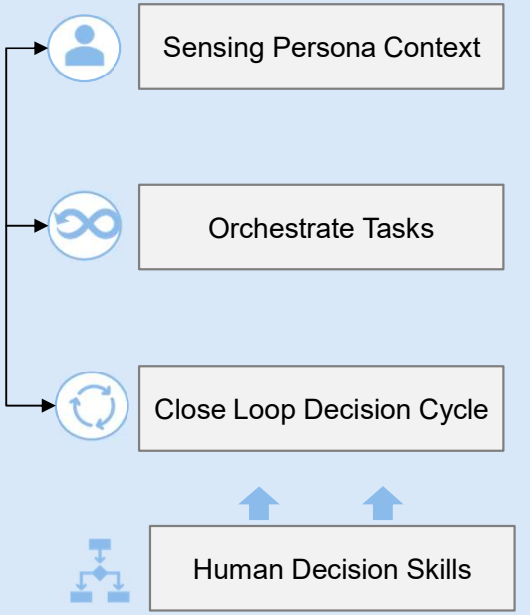

Human-Agent Team

- **Tool->Teammate**
- **Reactive->Proactive**

Machine	Human
Clearly defined & repeatable tasks	Complex & Exceptional case, final decision

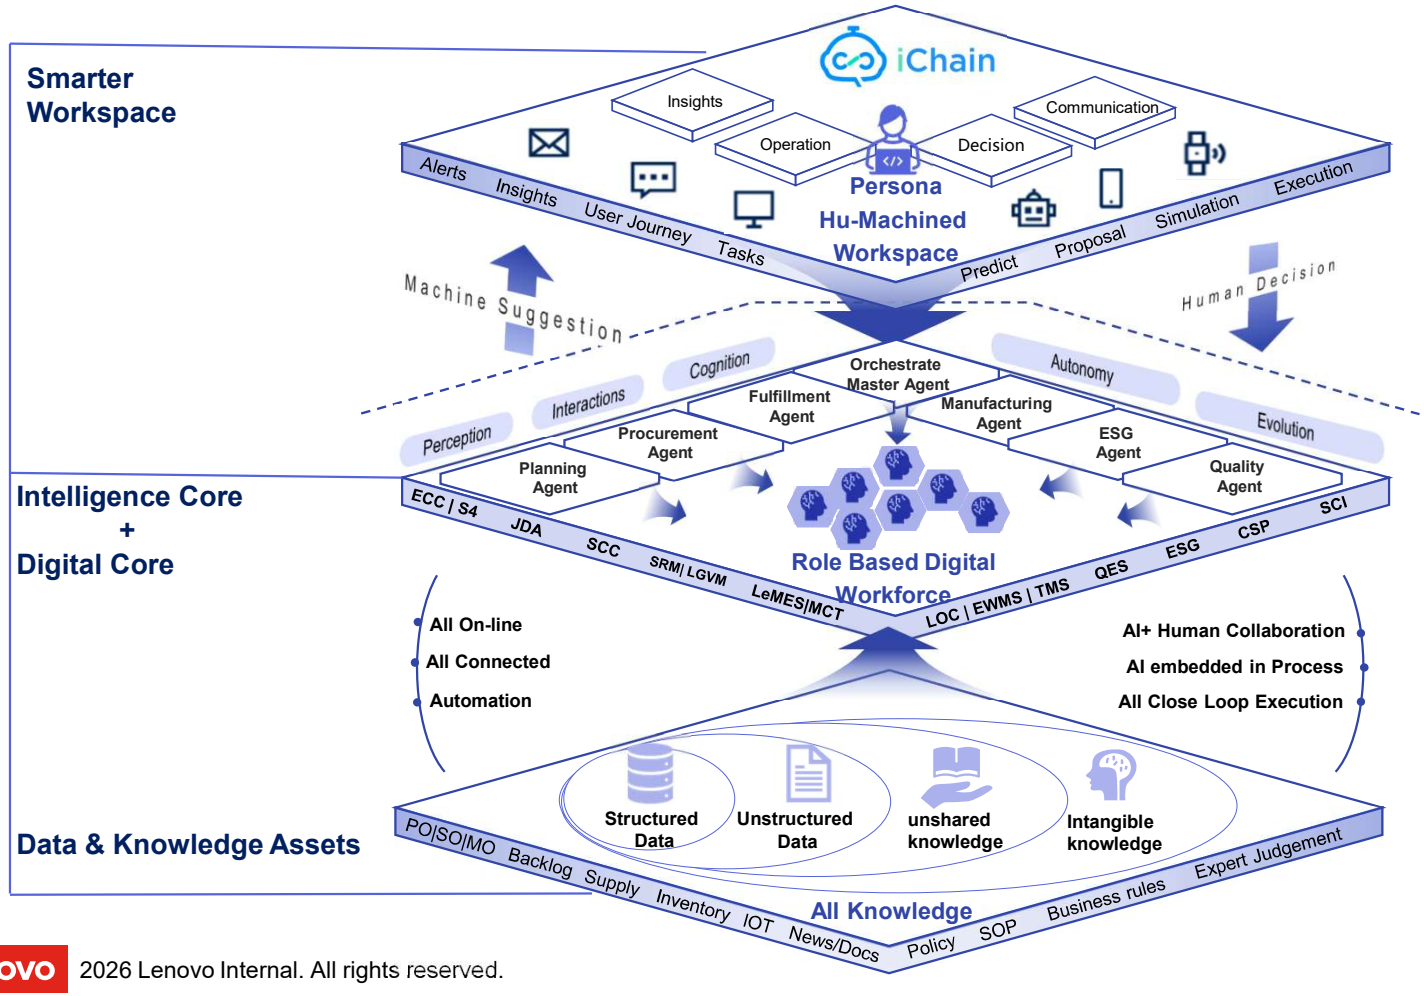

How-How it works?

iChain Persona Workspace & Agent Platform—helping every role see clearly, decide confidently, and act faster.

Building A Stronger Human–machine Collaboration Model Through iChain Persona Workspace And Agent Framework

Phase 3

Human-Agent Team

Humans set direction & check in; agents execute autonomously

Phase 2

Human with Agent Teammate

Humans + agents working as digital colleagues under human direction

Phase 1

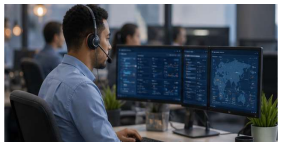

Human with AI Assistant

Every employee has an AI assistant to work better & faster

iChain Persona Workspace & Agent Collaboration Model

End-to-end scenario where humans and AI agents collaborate to plan, execute and optimize the supply chain

	1. Demand Sensing	2. Supply Planning	3. Sourcing & Procurement	4. Manufacturing	5. Logistics & Fulfillment	6. Customer Experience
	AI senses weak signals and predicts demand	AI agents create optimal supply plan	AI agents find best suppliers and negotiate	AI agents orchestrate production and adapt in real-time	AI agents optimize inventory, transportation and delivery	AI agents resolve issues and drive satisfaction
Human Role	 • Define business objectives & constraints • Review AI insights	 • Review & approve supply plan • Set priorities	 • Approve suppliers • Manage contracts and risks	 • Monitor production • Make decisions on exceptions	 • Oversee logistics operations • Handle exceptions	 • Focus on high-value customer interactions • Handle escalations
AI Agent	**Demand Agent** • Collect signals from market, social, sales, weather, etc. • Forecast demand at SKU, location & time level • Detect anomalies and opportunities	**Planning Agent** • Simulate scenarios & multi-objective optimization • Balance service, cost, inventory & risk • Recommend optimal supply plan	**Procurement Agent** • Identify & evaluate potential suppliers • Negotiate terms (price, lead time, MOQ) • Assess risk & compliance	**Manufacturing Agent** • Create & optimize production schedule • Adjust in real-time to changes & constraints • Maximize yield & OEE	**Logistics Agent** • Optimize inventory placement • Select best carrier & routes • Track in real-time & predict delays	**Customer Collaboration Agent** • Answer inquiries instantly • Resolve issues autonomously • Learn from feedback to improve

iChain Persona Workspace & Agent Experience

MY Workspace
One- stop view for each

Context Awareness
AI agents resolve issues and drive satisfaction

AI Insights & Recommendations
Actionable suggestions with reasoning

Agent Collaboration
Work with AI agents as teammates in real time

Simulation & What-if
Run scenarios & compare impacts before decisions

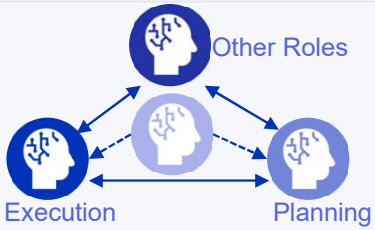

Task Orchestration
Assign, track & follow up tasks across team & agents

Closed-loop Execution
Agents execute, humans review exceptions & confirm

Learning & Evolution
Continuous learning from outcomes & feedback

Role-led Transformation Roadmap High-level View

	FY26-27 Pilot First 成功范式	FY27-28 Role Chain First 角色成链	FY28-29 Scale Role First 拓展规模
Role Selection (Deep Transformation)	 Execution Start with **high-value, high feasibility roles** **~10%** FTEs (9 Executives + 10 Ops Roles, ~450 FTEs)	 Execution Planning Expand to mid-priority roles and **form role chains** **~12%** FTEs (11 Ops Roles, ~520 FTEs)	 Scale **closed-loop ways of working** as the standard **~10%** FTEs (11 Ops Roles, ~480 FTEs)
Workspace Adoption (WAU)	Leverage pilot roles capabilities and prepare for Y2 **~20%** FTEs	Accelerate adoption by reusing cross-BG/Function capabilities **~40%** FTEs	Bring other key roles to prepare for the next phase of transformation **~30%** FTEs
Outcome	Work becomes **rule-based and repeatable**	Execution becomes **smoother across roles**	**New ways of working** become the operating norm

iChain Persona Workspace & Agent

iChain Persona Workspace & Agent Architecture

Master Agent

- Governance
  - Full-lifecycle management of all components
  - Security/Usage/Behavior statistics and analysis
- Collaboration
  - Cross-domain and GSC sub-agent automatically
  - High-quality agent metadata under governance
  - Proactive intention understanding
  - Proactive orchestration
  - Self service

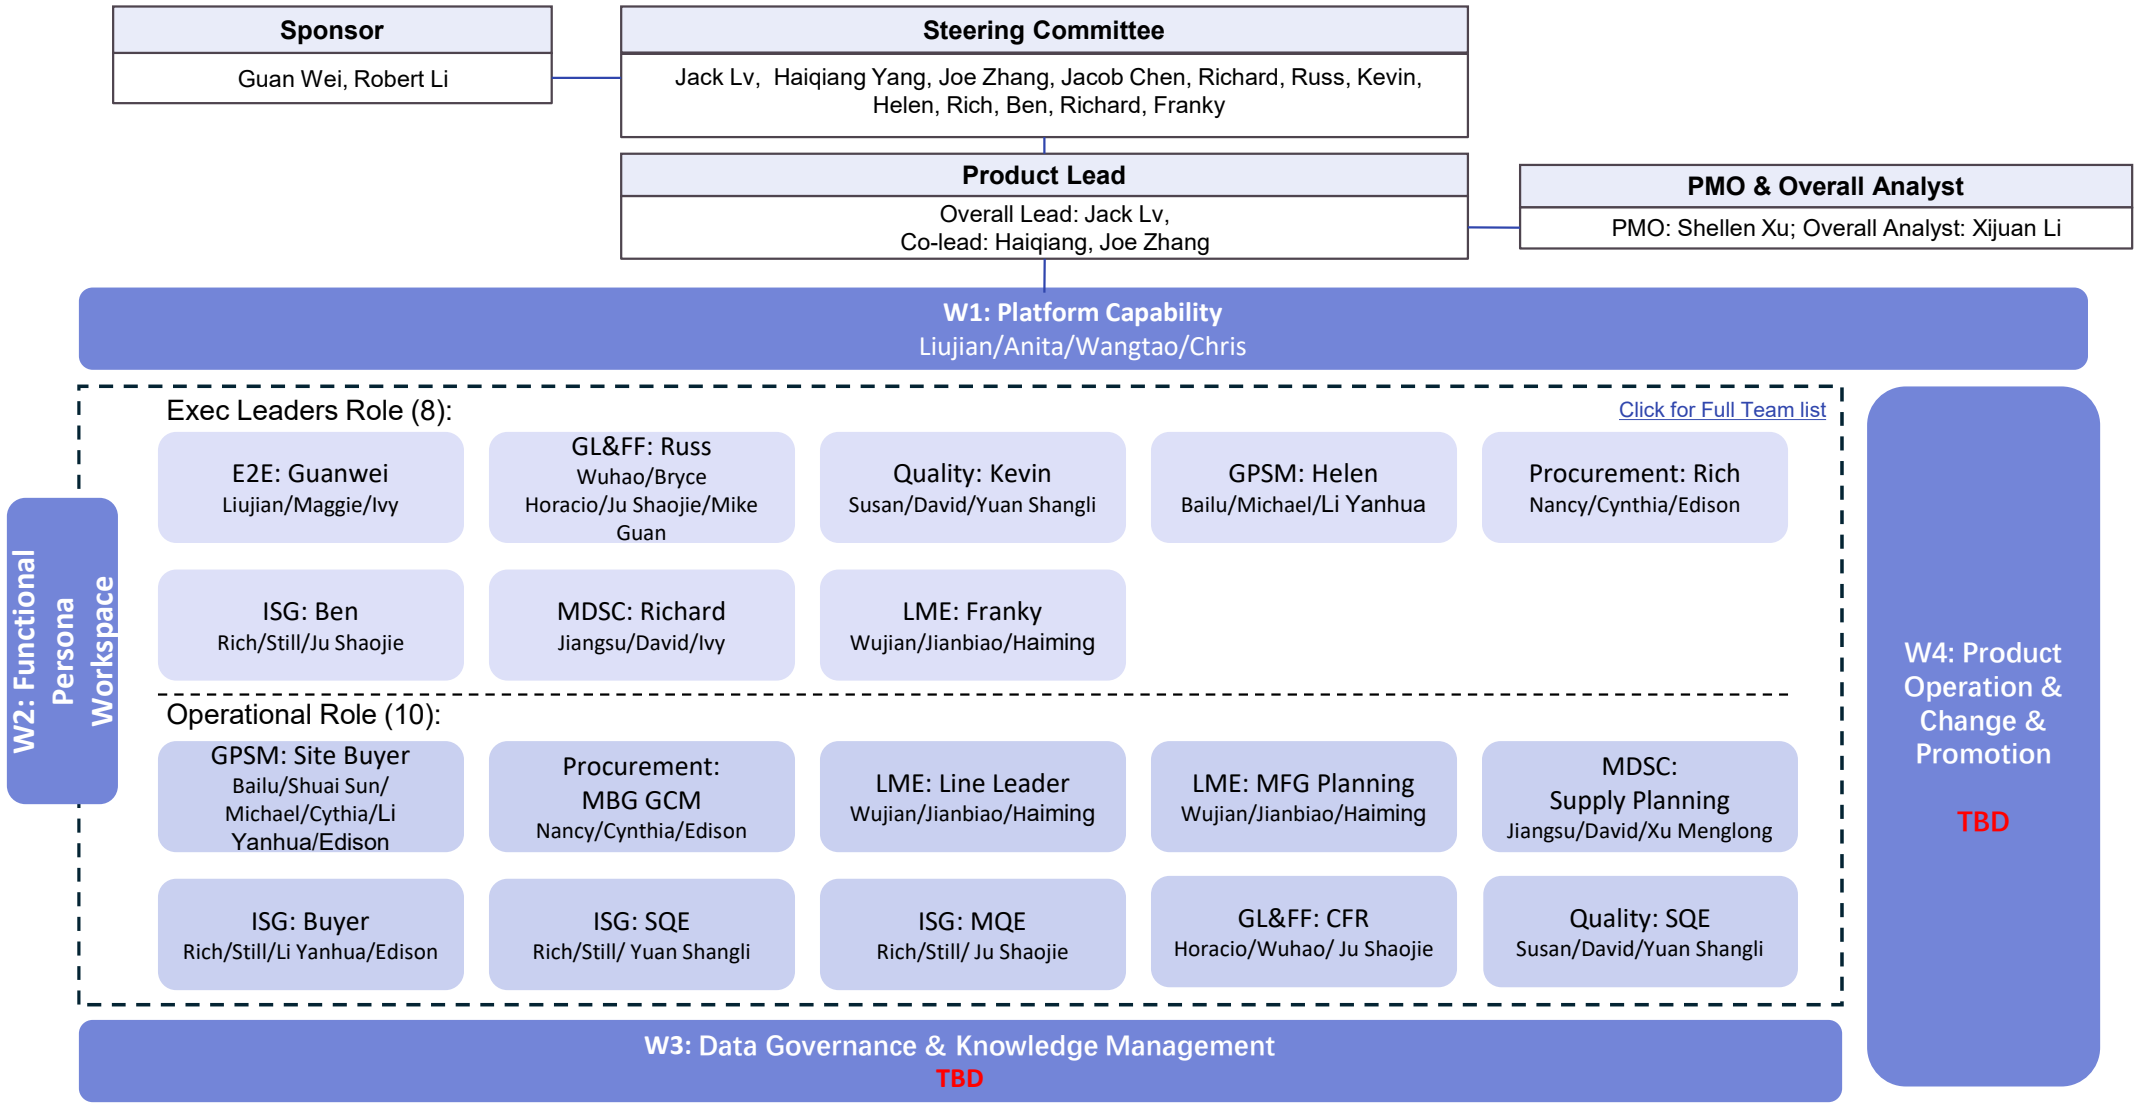

Sub Agent

- Focus on business capabilities in different scenario
- Sub-agents and the master agent collaborate
- Jointly built based on the Lenovo hybrid AI platform

Application

- Entry of the Lenovo GSC Agent
- Leverage existing capabilities
- Toolset of the Lenovo GSC Agent

iChain Persona Workspace Operation Model

iChain Persona Workspace Capability
